

### **Math Teacher - NYC Campus**

The Winchendon School seeks an innovative and ambitious educator who can teach throughout our math curriculum from Algebra to Calculus. Winchendon's academic program intentionally builds essential academic skills in the classroom and through an active field-based program, while facilitating opportunities for students to direct their education toward internships, independent projects, and areas of interest. For all of our students, we strive to assist in the growth of character traits and life skills essential for a successful future: initiative, creativity, grit, empathy, cooperation, and independence. Ours is a college preparatory school with the mission to support students who have not been as successful in more traditional schools, and so our faculty must be relentlessly empathetic, creative, and flexible as we build skills and confidence among students who are largely underserved in other programs. A commitment to Diversity, Equity, and Inclusion is shared among all faculty members as we aspire to be a more just and fair school community.

Our faculty are called upon to teach a range of subjects and participate in multiple functions of the school. Additionally, a qualified teacher will be a dedicated student of teaching methods and student-centered engagement, incorporate contextualized project and field-based learning opportunities into their classrooms, and emphasize self-reflection as an assessment strategy and vehicle to encourage growth. As reflective practitioners, our approach to professional oversight and development is rooted in routine self, peer, and administrative evaluation. Above all, we employ teachers who love and are loved by their students.

#### **Qualifications:**

Bachelor's degree required

Interest in and demonstrated skill in working with adolescents

A commitment to an inclusive community

#### **Characteristics:**

Effective communicator

Active problem solver

**THE BEST COLLEGE PREP SCHOOL FOR STUDENTS WITH SIGNIFICANT UNREALIZED POTENTIAL**
